The KR-W8000SCD is a practical all-in-one solution that combines all the virtues of a complete hi-fi system in a sleek designed housing. With a full range of modern connection options and sources, the smart CD receiver is recommended as the perfect stereo control center for hi-fi fans. There is even an integrated digital amplifier with DSP technology and 2 x 30W RMS power on board, making the KR-W8000SCD a powerful sound player for HiFi speakers. In addition to the massive speaker terminals, analog and digital inputs (optical/coaxial) allow the connection of a wide variety of players such as TV receivers or game consoles. If you want to expand the connected speakers in the deep bass range, you will find a woofer output for an active subwoofer. For vinyl lovers, the phono input (MM) offers the option of connecting a turntable directly. The smart receiver also supports wireless standards such as Bluetooth audio streaming or network services such as Spotify or Deezer, which, like the integrated Internet radio and podcast player, obtain their data from the web via WiFi.
